

Solutions For Higher Education

SANAtech your Partner in Education

 **Cordoba**
Education Management System

Empower the individual, the institution, and the education community

SANAtch works closely with colleges and universities of all types and sizes to enhance the institutional performance and help individuals achieve their goals. Students, faculty staff, directors, administrators and alumni are realizing new possibilities in teaching, learning and management of educational processes. This is the power of the integrated web-based education management system CORDOBA.

Using CORDOBA, higher education institutions are able to improve the education experience. Integrated, user-centric technologies enhance the quality of service. Individuals access information easily, collaborate with peers and work efficiently. Whether it is a student accessing assessment work online or a finance officer generating efficiency reports, CORDOBA is the suitable solution.

The screenshot displays the CORDOBA Education Management System interface. The top header includes the logo and the text 'Education Management System'. Below the header, there is a navigation menu on the left and a main content area. The main content area shows a 'School Information' section with a table of fields and values, and a 'Sections' table below it.

Spring	01/1	03/31

Solutions For Higher Education

CORDOBA is a solution framework that is flexible and robust enough to grow with higher education institutions and their evolving needs. It extends beyond traditional administrative systems, providing a choice of tools that support the entire higher education enterprise.

ADMINISTRATIVE SOLUTIONS

Manage data strategically to enhance efficiency, productivity, business processes, and delivery of service to your users.

ACADEMIC SOLUTIONS

Support and enhance academic programs, including course management, assessment, electronic portfolios, e-learning planning and development, and related solutions.

INFORMATION ACCESS AND BUSINESS INTELLIGENCE SOLUTIONS

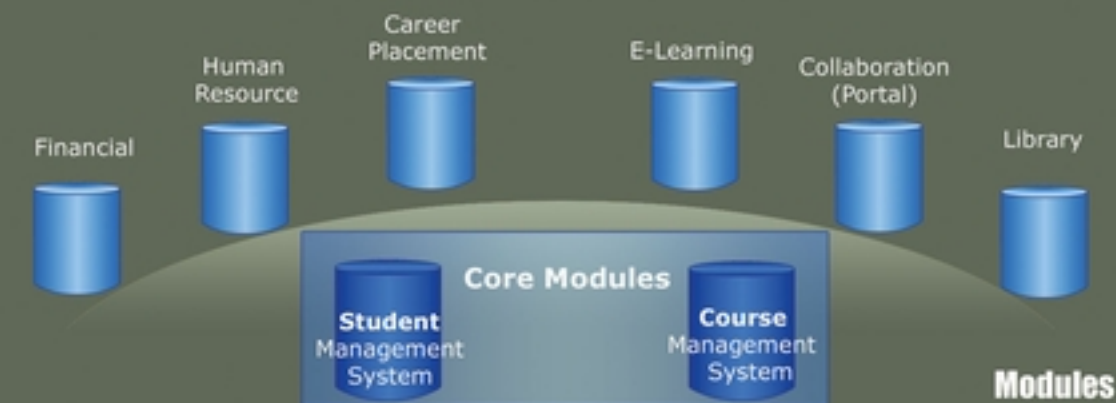

Facilitate how data are stored, accessed, reported, analyzed, and distributed to those who need them via business intelligence tools, reporting, and strategic knowledge applications.

INTEGRATED SOLUTIONS

Collate the mix of applications required to run your institution seamlessly, enabling multiple levels of interconnectivity including visual, application, and data integration.

CORDOBA Modules

Users

SANAtech has built CORDOBA using Microsoft's .NET technology which enables us to extend the product to provide web services and enhanced functionality. CORDOBA also integrates with Microsoft Share Point server and Microsoft Great Plains server to provide an enterprise solution.
